

FIB beer systems

A better way to serve beer

an **ANDUS** group company

Certificates/Standards

- ISO 9001
- PED D, H, H1
- SQL
- VCA
- F-gassen
- ASME U, U2 & R
- EN3834-2
- MID

Design codes

- EN-13445
- AD2000
- ASME SEC. VIII Div. 1,2
- RPD-5500
- CODAP

Advantages

- No additional cooling
- Space saver; one tank equals fifty kegs
- Time saver; no keg connecting or precooling
- No CO₂ needed
- Plug and play
- The freshest beer possible

Logistics & events

There are many different ways to transport cold fresh beer to a venue. In a simple insulated tank or in a unit with components, such as:

- Beer hose
- Cooler and compressor
- Flowmeter, beer counter and printer
- CO₂ unit

Whichever option you choose, all parts are from renowned companies, available worldwide. Many of the items used by FIB can be reused in your new delivery unit. This could save you a lot of money.

FIB Beer Systems is experienced in providing equipment for events. All tanks are insulated and can be equipped with a cooling system and compressor. Connect the unit to the grid and the tap and the cold fresh beer is ready to be served. The event tank saves both time and money. Precooling the beer and changing the kegs is no longer required. Tapping loss is close to zero; one 1000-liter tank equals twenty 50-litre kegs.

Event bar

- An event bar on wheels with a 500L insulated tank and a 20L keg for special beers.
- Beer, 500L tank, 20L keg with CO₂ bottle, cooler, compressor, drip tray and 2 fountains in one unit.

Flexibility

FIB Beer Systems, the inventor of tank beer, has seen it all. From local events up to major concerts. Motto: "Keep it simple, cut logistic costs and tapping loss and have a cold fresh beer in no time."

Demand

A solution for events or speed delivery. A small trailer with tank, cooler and compressor. One tap or more? Or maybe a canopy? All you need is a towbar.

Overview beer delivery systems

Single tank in frame

- Tankbeer clients: 5
- Volume: 1.000L

Skid (with insulated tanks)

- Tankbeer clients: 10
- Volume: 1.000L+

Refrigerated delivery unit small

- Tankbeer clients: 60
- Volume: 3.000L+

Refrigerated delivery unit large

- Tankbeer clients: 100
- Volume: 5.000L+

Beer truck*

- Tankbeer clients: >100
- Volume: 8.000L

Trailer

- Tankbeer clients: 100
- Volume: 10.000L+

* Beer trucks are available with multi compartments, CO₂ bottles and CO₂ control.
